## An Essay on Rabbits.

There are many kinds of rabbits besides the Welsh kind and Belgian hares.

The rabbit is what some people haven't any more sense than.

Rabbits are great mathematicians. They multiply with much rapidity and are good to eat in addition. Almost any tried rabbit is big enough to divide.

When we were boys we used to tie on our alimentary canal near the root of a tubular tree where a dog had chased a closely-pursued bunny to sequester himself and twist at that entrenched cat till we had so much of his foliage on the green brier we were using that he was glad to come out and join the majority of his species.

This was rank cruelty from a humane standpoint, but it is part of a regular boy's normal life, an why waste the rag and get horrified over it?

If you are fond of young fruit trees and rabbits, you are doomed to have a one-sided happiness in your life, for you will have to give up one or the other.

A 10-cent rabbit with its belly full of the vital sap bark of a \$12 apple tree is the happiest thing ever—Strickland Gillilan in Farm Life.
